Ex No: 3 Patient Appointment Booking Form (Advanced) — Advanced Fields Use Case

Pragadeesh - 240701388

1. Aim

To extend the Appointment_Booking_Form with all seventeen Advanced Fields so that the form can verify doctor availability, register accompanying family members, compute the net payable fee, accept media and consent, and issue a scannable appointment reference.

2. Procedure

1. Open *Appointment_Booking_Form* in Form Builder and add the new sections below.
2. **Section E — Doctor Verification & Vitals:** Doctor_Availability_Lookup (Lookup to a master *Doctors* form, auto-fills specialization and time slots), Patient_Photo (Image), Previous_Medical_Report_Upload (File Upload), Body_Temperature_F (Decimal).
3. **Section F — Family Registration & Media:** Accompanying_Family_Members (SubForm: name, relation, age), Previous_Report_Portal_URL (URL), Symptom_Video (Video), Symptom_Voice_Note (Audio).
4. **Section G — Fee & Transport:** Requires_Ambulance_Pickup (Decision Box), Consultation_Fee (Currency, INR), Insurance_Coverage_Percent (Percent), Net_Payable_Fee (Formula).
5. **Section H — Consent & System Values:** Clinic_Guidelines_Display (Rich Text), Patient_Digital_Signature (Signature), Appointment_Submitted_On (Date-Time), Appointment_ID (Auto Number), Appointment_QR_Code (QR/Barcode).
6. Configure the rules:
   - Lookup: type-ahead search against the Doctors form.
   - SubForm: minimum 0 and maximum 4 rows.
   - File Upload: PDF, JPG, PNG only, maximum 5 MB.
   - Image: JPG and PNG only, maximum 2 MB.
   - Video: maximum 30 seconds and 50 MB.
   - Percent: range 0 to 100. Currency: non-negative values, INR.
   - Formula (read-only): `Consultation_Fee - (Consultation_Fee * Insurance_Coverage_Percent / 100)`
   - Auto Number: prefix `CLN-APT-`, current year and a 6-digit sequence.

- QR/Barcode: generated from Appointment_ID immediately after submission.
- Signature and Decision Box: mandatory.

7. Preview the form, fill the SubForm with two family members, and confirm the Net Payable Fee updates.
8. Submit two records and check the Appointment ID and QR Code in the report.

[Insert screenshot: Doctor Availability Lookup in action]

3. Result

The form was extended with all seventeen Advanced Fields. Fees were computed automatically, doctor availability was verified through the Lookup, and each booking received a unique Appointment ID and a scannable QR code.
