Ex No: 8 Integrating Zoho Creator with Zoho Calendar using Connections and APIs

Pragadeesh - 240701388

1. Aim

To integrate the Patient Appointment & Scheduling Management application with Zoho Calendar using a connection, a conditional workflow and Deluge scripting, so that a calendar event is created automatically for every confirmed appointment.

2. Procedure

Phase A — Create the connection

1. Log in to Zoho Creator and open the application.
2. Under **Develop**, open **Microservices → Connections** and click **Create Connection**.
3. Select **Zoho OAuth**, name it `zoho_calendar_connection`, and choose the scopes `ZohoCalendar.calendar.ALL` and `ZohoCalendar.event.ALL`.
4. Click **Create and Connect**, accept the permissions, and confirm the status shows **Connected**.

Phase B — Create the workflow 5. Open **Workflows → Create Workflow**, choose *Appointment_Booking_Form*, Record Event = Created, Form Event = Successful form submission, and name it *Sync_To_Zoho_Calendar*. 6. Add a condition so the action runs only when the Department and Preferred_Appointment_Date are not blank. 7. Add a Deluge action:

```
appt = Appointment_Booking_Form[ID == input.ID];
start = appt.Preferred_Appointment_Date.toString("yyyyMMdd") + "T" +
appt.Preferred_Appointment_Time.toString("HHmmss") + "+0530";
eventData = Map();
eventData.put("title", "Appointment - " + appt.Patient_Name.first_name);
eventData.put("dateandtime",
{"timezone":"Asia/Kolkata","start":start,"end":start});
eventData.put("description", "Department: " + appt.Department);
resp = invokeurl
[
    url: "https://calendar.zoho.in/api/v1/calendars/<calendar_uid>/events"
    type: POST
    parameters: {"eventdata": eventData.toString()}
```

```
    connection: "zoho_calendar_connection"
];
info resp;
```

8. Save the script and the workflow.
9. Test by submitting an appointment and open Zoho Calendar to confirm the event appears. Check the execution log if it does not.

[Insert screenshot: Add Connection window and Connected status]

[Insert screenshot: Workflow with Deluge action]

[Insert screenshot: Event created in Zoho Calendar]

3. Result

Zoho Creator was connected to Zoho Calendar, and every submitted appointment created a calendar event automatically.
